```
C:\Users\HP\Desktop\OS-Project>a.exe
Enter Memory Size: 2000
Enter the number of processes: 7
Enter process details as stated:
Process ID: 1
Process Arrival Time: 0
Process Lifetime: 200
No of segments of Process: 2
Enter size of segments separated by space: 200 300
Process ID: 2
Process Arrival Time: 0
Process Lifetime: 500
No of segments of Process: 1
Enter size of segments separated by space: 500
Process ID: 3
Process Arrival Time: 0
Process Lifetime: 700
No of segments of Process: 2
Enter size of segments separated by space: 100 100
Process ID: 4
Process Arrival Time: 0
Process Lifetime: 1000
No of segments of Process: 3
Enter size of segments separated by space: 100 400 100
Process ID: 5
Process Arrival Time: 500
Process Lifetime: 600
No of segments of Process: 2
Enter size of segments separated by space: 500 100
Process ID: 6
Process Arrival Time: 600
Process Lifetime: 600
No of segments of Process: 2
Enter size of segments separated by space: 500 100
Process ID: 7
Process Arrival Time: 700
Process Lifetime: 600
No of segments of Process: 1
Enter size of segments separated by space: 200

Press 1 for first fit or 2 for best fit or 3 for worst fit or any other number key for exiting: 3
----------QUEUE STATUS----------
```

At time t = 0, these are the processes present in Queue:
Process: 1 Arrival Time: 0
